

The Challenge

Pape-Dawson was having difficulty finding a vendor who could accommodate on-site testing of its employees. They specifically needed a partner who could reliably conduct on-site drug testing from 5am to 10am at an affordable price. Pape-Dawson came across Fastest Labs while attending a local SHRM event.

The Solution

Since partnering with Fastest Labs, Pape-Dawson has experienced faster scheduling of drug screens for new hires and random programs. The online portal allows Pape-Dawson to view results quickly and efficiently versus having to search for emails. Fastest Labs' ability to help manage 3rd party PHMSA compliance substantially reduced hurdles and simplified implementation. On-site testing was completed reliably at the desired hours, and Pape-Dawson found the cost for services very reasonable with an added benefit of superior customer service.

The Customer

Pape-Dawson Engineers, Inc. is an innovative civil engineering firm dedicated to developing solutions to best serve clients and the public. They offer a full range of services in land development, hydrology/hydraulics, water resources, transportation/traffic, surveying, environmental/geosciences, GIS, and mining.

Industry: Civil Engineering

“We are very happy to have Fastest labs as our resource and are satisfied with the service level they provide us.”

“We plan to continue to partner with Fastest for our drug screening program needs.”
